

AMAS

Audivo Multiroom Audio Solution

EMAS

Embedded Module for Audio Streaming, HighEnd Hifi Solution

m:app

Advanced app for smartphone and tablet

m:remote

Smart bidirectional universal remote (RF and IR)

RF and Wireless Audio

Wireless audio transmission, DAB radio and Bluetooth

Service and Support

European engineering, development service for HW and SW, support for production, SW maintenance
Audivo is authorised partner of StreamUnlimited.

Overview

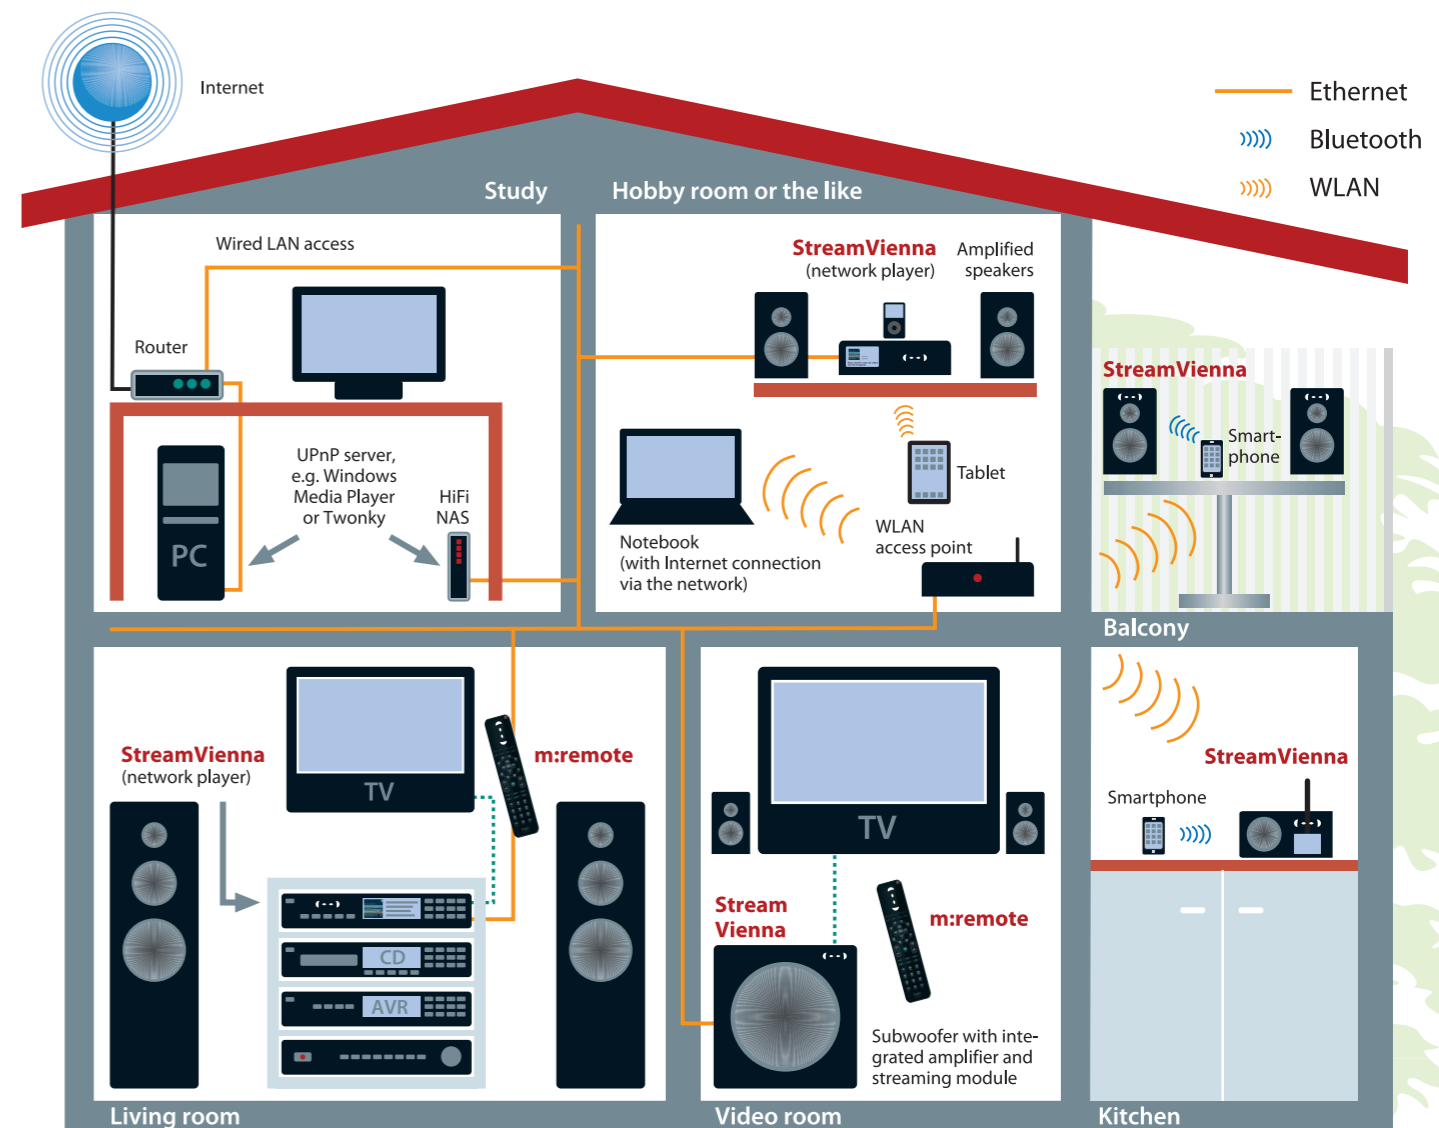

AMAS is a variety of components that can be combined to a Multiroom solution:

- **StreamVienna**: streaming client and Multiroom master / client
- **Kleernet**: wireless audio transmission
- **m:remote**: universal, bidirectional remote control with BTLE and IR support
- **m:app**: intuitive app to control all devices in the system from any place in the house

Besides UPnP (DLNA) sources via Ethernet/WLAN and USB, the clients also support Bluetooth audio streaming from mobile devices. Music from all sources of the **StreamVienna**, including BT, can be redistributed to the other clients.

Easy setup via AP mode or bidirectional remote.

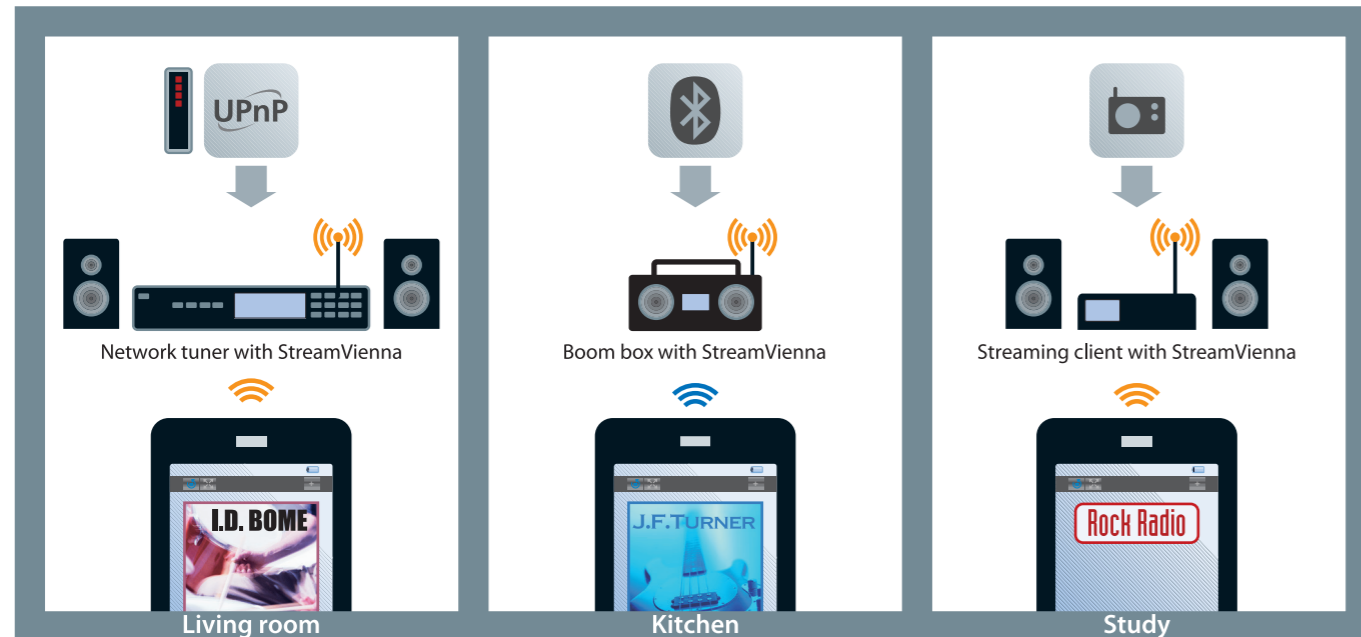

Clients can be combined to a synchronized party mode. Via the intuitive app, all clients in the network can be controlled from any location in the house.

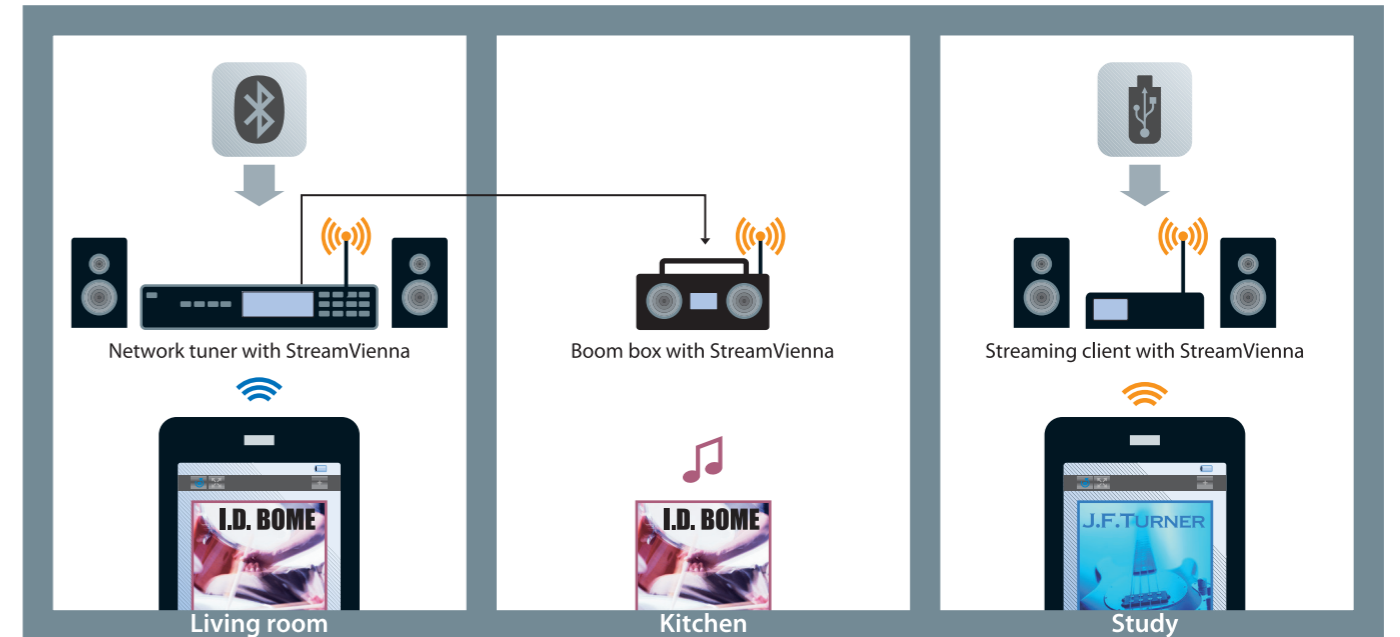

Listen to your music in your room:

Any client can replay different contents from various sources (UPnP, Internet radio, USB, BT)

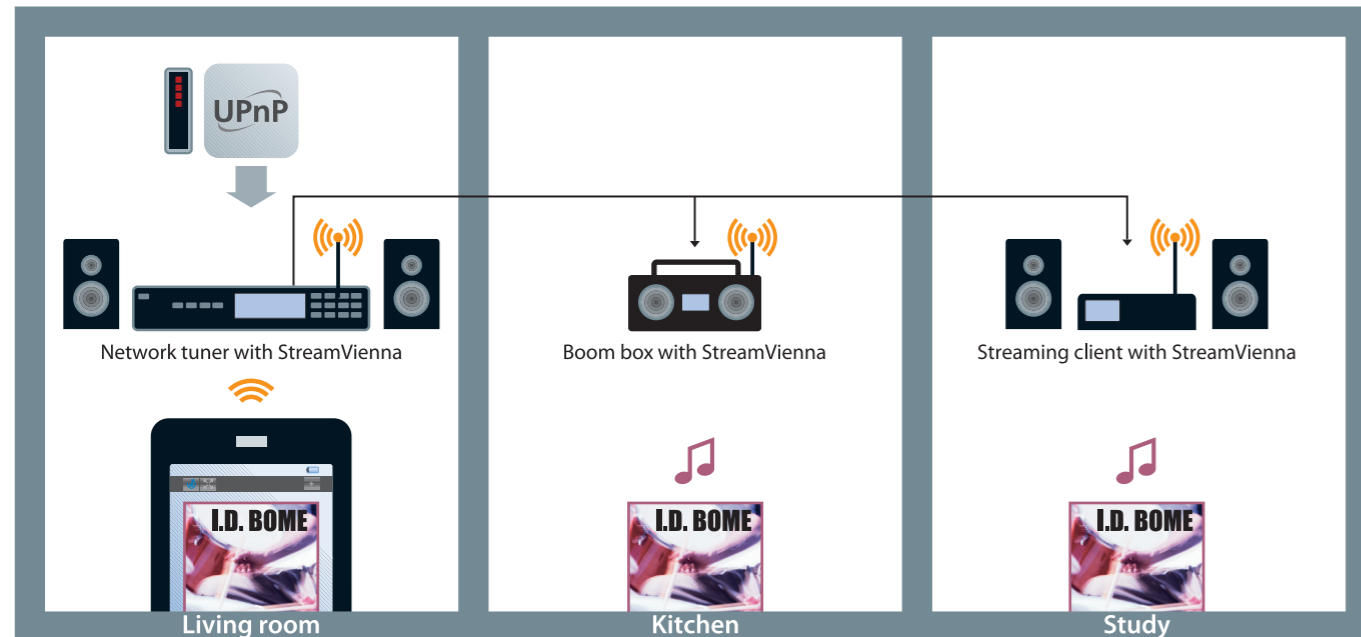

Share music:

Redistribute music from a **Station** to other clients.

Control clients in any room from any place:

Play your music in all rooms, select the participants for a "party mode".
The selected clients play the same music at the same time (synchronized).

Benefits

- Any source of the **Station** can be redistributed in a multiroom system
- Easy setup and control, WLAN (AP-Mode), m:remote
- Fully featured app (iOS, Android); Extended app for tablets
- Premium services (Spotify, Deezer, Internet Radio and more)
- Customized solution possible (incl. Local UI, DAB/FM, codecs, etc.)
- Tested HW and SW solution -> short time to market
- Reduced development cost
- SW maintenance by Audivo
- European engineering
